Recruitment and Financial Support for Domestic and Foreign Visiting Students

The National Center for Theoretical Sciences (hereafter referred to as NCTS) inaugurates the Visiting student financial support program to encourage undergraduate and graduate students who aspire to carry out research in the field of theoretical sciences.

The program is applicable for foreign students who visit NCTS for one to twelve months, and domestic students who visit NCTS for three to twelve months. Visiting students shall participate in research activities taking place at NCTS, and conduct research and study under supervision of mentors.

NCTS shall help with the arrangement of accommodation in NTU Student's dormitory for all visiting students. Foreign student's visit will be supported in the light of regulations of the Ministry of Science and Technology (up to 30,000NTD per month).

The application process will be announced every year in March. Cooperation between NCTS and other institutions or research groups with regard to the visiting student program is possible.
