

NCTS Workshop on Analytic Trends in Complex Geometry & Related Fields

Date | 17-21 June, 2019

Venue | R440, Astro-Math Bldg., NCTS

Aim & Scope

The workshop consists of three series of mini-courses and several topical talks given by leading experts in complex geometry and related fields. We hope to introduce this active research area to our young members and encourage more collaboration between researchers as well.

Mini Course

Vestislav Apostolov Université du Québec à Montréal
- *The weighted Calabi problem in Kähler and Sasaki geometry*

Junyan Cao Paris VI
-TBA

Julien Keller Aix-Marseille University
- *Donaldson's J-flow and the Kähler cone: analytic and algebraic aspects*

Organizers

Jungkai Chen National Taiwan University & NCTS
Shu-Cheng Chang National Taiwan University
Steven Lu Université du Québec à Montréal

Invited Speakers

Nathan Grieve Michigan State University
Eiji Inoue University of Tokyo
Yum-Tong Siu* Harvard University
Hajime Tsuji Sophia University
Damin Wu University of Connecticut
Xiaokui Yang Yau Mathematical Sciences Center
Saikee Yeung Purdue University

*to be confirmed
