

Workshop for Numerical Algebra & Data Science

Date 2019.12.20-22
Venue R202, Astronomy-Mathematics Building, NTU

Aim & Scope

The treatment of numerical algebra to data science has a wide range of applications and covers most fields of research. It is one of the critical topics and contains a variety of scientific problems. We hope that through this workshop, invited scholars can share and exchange their research conclusions with scientists in related fields.

Keynote Speakers

Zhaojun Bai

University of California,
Davis

Moody T. Chu

North Carolina State University

**Raymond Honfu
Chan**

City University of Hong Kong

Ren-Cang Li

University of Texas at Arlington

Organizers

Tsung-Ming Huang

Yueh-Cheng Kuo

Wen-Wei Lin

Shih-Feng Shieh

National Taiwan Normal University

National University of Kaohsiung

National Chiao Tung University

National Taiwan Normal University

Sponsors

NCTS
National Center for Theoretical Sciences

國立交通大學
丘成桐中心
Shing-Tung Yau Center
