

Date 2020.3.24

Venue R201, Astro-Math Bldg., NTU (08:00-13:00)
R202, Astro-Math Bldg., NTU (13:00-17:00)

NCTS workshop on New Phenomena in Evolutionary Equations and Their Steady States

Aim & Scope

In recent years, there have been important developments on various aspects of evolutionary equations such as fine properties of long term behavior of the solutions, the effect of non-linear boundary conditions, and new patterns of the steady-state and dynamical solutions. This workshop aims to bring leading experts and young researchers together to introduce pioneering works and explore new ideas for evolutionary equations and related topics.

Invited Speakers

Shih-Hsin Chen

National Taiwan University

Jann-Long Chern

National Central University

Jia-Yuan Dai

National Center for Theoretical Sciences

Kazuhiro Ishige

University of Tokyo

Tatsuki Kawakami

Ryukoku University

Yoshihisa Morita

Ryukoku University

Yojiro Tateishi

University of Tokyo

Erbol Zhanpeisov

University of Tokyo

Organizers

Chiun-Chuan Chen

National Taiwan University

Shih-Hsin Chen

National Taiwan University

Jia-Yuan Dai

National Center for Theoretical Sciences

Chun-Hsiung Hsia

National Taiwan University
