**National Center for Theoretical Sciences Mathematics Division (NCTS)**  
**Guidelines for Travel Support for International Destinations**

1. To enhance academic exchanges with research centers and universities abroad, the National Center for Theoretical Sciences Mathematics Division (hereinafter referred to as the NCTS) encourages outstanding or promising domestic researchers, postdoctoral researchers, and students to conduct short-term academic visits overseas and participate in important major international mathematics conferences. Thus, the NCTS establishes these guidelines.
2. The eligible applicants under these guidelines include project principal investigators, researchers associated with the NCTS, students and postdoctoral fellows who participate in the NCTS-related programs, and domestic scholars in related fields.
3. Those intending to apply for the travel support, please submit the application form (attached) at least 4 weeks prior to the scheduled departure date (or eight weeks if the overseas stay exceeds one month). The application should include relevant event information, application form, and a recommendation letter from the advisor (recommendation letters are not required for applicants of assistant professor level or above). Students should also attach the academic transcripts.
4. The applications will be reviewed first by the NCTS Program Chair of the relevant research topic program and then by the Center director. Approved applicants will receive subsidies, which may cover travel expenses, living expenses, and registration fees for taking part in the exchange program. The subsidy amount will be approved by the Center director and must not exceed the reimbursement standards set by the National Science and Technology Council (NSTC). For subsidy amounts exceeding NT\$150,000 or periods exceeding one month, approval from the executive committee is required.
5. These guidelines and their revisions must be approved by the executive committee and shall be implemented from the date of announcement.
