

2022 NCTS PDE, Dynamical Systems and Analysis Young Scholar Workshop

Date: February 8 - 12, 2022

Venue: Room A316, College of Science and Engineering Building 1, NDHU

Aim & Scope:

In this workshop, we aim to invite young students and young researchers in PDEs, dynamical system, analysis and related fields to introduce their current works and explore new ideas. The main purpose is to create an environment for young students and young researchers to discuss with each other. On the other hand, we invite lecturers to give a brief account on functional analysis (by Guo-Dong Hong) and on recent development in fluid PDEs (by Professor Chi-Hin Chan). This is a preparation of prelims for MSRI summer school "Recent Topics in Well Posedness" which will take place in the July of 2022 at NCTS. We expect this helps local researchers to both maintain their research enthusiasm and to cultivate their mathematics ability.

Invited Speakers:

Junsik Bae	National Center for Theoretical Sciences
Chi-Hin Chan	National Yang Ming Chiao Tung University
Shih-Hsin Chen	National Center for Theoretical Sciences
Jia-Yuan Dai	National Chung Hsing University
Guo-Dong Hong	National Taiwan University
Ming-Jiea Lyu	National Cheng Kung University
Sanghyuck Moon	National Center for Theoretical Sciences
Jin Zhi Phoong	National Taiwan University
Jhe-Kuan Su	National Taiwan University

Organizers:

Jung-Chao Ban	National Chengchi University
I-Kun Chen	National Taiwan University
Chun-Hsiung Hsia	National Taiwan University
Chun-Yen Shen	National Taiwan University
Kung-Chien Wu	National Cheng Kung University
Wei-Ying Wu	National Dong Hwa University
