

One-Day Workshop on Nonlinear Evolutionary Dynamics

Date: 2025/03/20

Venue: R505, Cosmology Bldg., NTU

Aim & Scope

This workshop offers five talks highlighting cutting-edge research in nonlinear dynamical systems, including bifurcation theory, global dynamics, and real-world applications. It aims to showcase the recent developments in nonlinear evolutionary dynamics while fostering interaction and discussion. Participants are invited to share ideas and spark dialogue. We anticipate that this event will foster the exchange of ideas and strengthen the ties between the Taiwanese and international communities.

Invited Speakers

Bernold Fiedler

Alejandro López Nieto

Van Tien Nguyen

Toshiyuki Ogawa

Yuya Tokuta

Free University of Berlin

National Taiwan University

National Taiwan University

Meiji University

Kyoto University

Organizers

Jia-Yuan Dai

Alejandro López Nieto

Yuya Tokuta

National Tsing Hua University

National Taiwan University
