Date
2026/11/09–11
(Mon.–Wed.)

Venue
R515, Cosmology Bldg., NTU

Aim & Scope

The NCTS-IBS CGP Joint Workshop aims to promote research collaboration and academic exchange between researchers in Taiwan and Korea, with a focus on symplectic geometry and geometric analysis. The workshop will bring together researchers from NCTS, IBS Center for Geometry and Physics (CGP), and related institutions to share recent developments and explore interactions between these areas.

Topics include symplectic and Hamiltonian geometry, holomorphic curves and Floer theory, geometric variational problems and flows, nonlinear PDEs in geometry, and related topics. Through research talks and discussions, the workshop seeks to foster new collaborations and strengthen the partnership between NCTS and IBS CGP.
